

FIBRE CLAY

NEDERLANDS

Fibre clay is een mengeling van klei en natuurlijke producten die aangebracht wordt op een net van glasvezel. Dit product is UV-bestendig en vorstvrij onder normale omstandigheden. Zorg er dus voor dat het water niet in de pot kan blijven staan.

Het is ook aangeraden om tijdens periodes van strenge vorst de pot op voetjes te plaatsen.

ENGLISH

Fibre clay is a mixture of clay and natural products on fiberglass matting.

This product is UV resistant and frost resistant under normal conditions of use (no water accumulating inside and using feet to lever product above the ground during strong freezing periods).

FRANCAIS

Fibre clay est un mélange d'argile et de produits naturels sur un filet de fibre de verre. Le produit est UV-résistant et résiste au gel sous conditions normales.

Évitez que l'eau reste dans le pot. En cas de gel sévère, il est conseillé de mettre le pot sur des pieds.
