

CRISALYA

NEDERLANDS

Het Crisalya assortiment volgt de klassieke vormen, eenvoudig en aantrekkelijk. De methode bestaat uit het injecteren van plastic (propyleen) in een gesloten mal op de juiste temperatuur. Hierdoor verkrijgt men een product dat volledig recycleerbaar is en bestand tegen UV-stralen.

ENGLISH

Crisalya line duplicates the classic forms, the lines are simple and pleasing. They are made of plastic PP (propylene) by the method of injection molding. This is one of the most common methods of shaping plastic resins accomplished by large machines where plastic resin is heated to the appropriate temperature and injected into molds.

Products are completely recyclable and resistant to UV rays.

FRANCAIS

Crisalya est un assortiment de modèles classiques et simples qui plaît à tout le monde.

C'est un procédé de moulage par injection où la matière plastique (propylène) est ramollie par la chaleur puis injectée dans une moule, et ensuite refroidie. Le résultat est un pot entièrement recyclable qui résiste aux rayons UV .
